

DriveOn is Different

A professional approach; we have collaborative meetings & establish goals at the onset of training.

There is one occupational therapist on staff.

All instructors have their Association for Driver Rehabilitation Specialists memberships.

All instructors have a college degree.

Staff is experienced teaching those with learning disabilities, autism, anxiety, medical conditions, seniors, etc.

There are two certified Driver Rehabilitation Specialists on staff.

We have a hi-tech van equipped to meet the needs of individuals with quadriplegia, muscular dystrophy, etc.

We offer driver evaluations (clinical and behind the wheel) to assess readiness to be a driver.

We have equipment evaluations for passenger transportation.

“At first I was very nervous about learning to drive with adaptive equipment...but I learned a unique skill and it drastically improved my independence in all aspects of life.
- Tommy

BEGINNER DRIVER

Helping your child learn to drive safely and confidently.

If you have a child with/without a developmental disability or a medical condition, you know challenges can extend beyond the classroom. We can help them to focus on the critical elements of driving with one-on-one, customized training.

DRIVERS WITH A MEDICAL CONDITION

Helping you gain or continue your independence, employment, and mobility.

Our experienced driving professionals will evaluate your driving ability, create a program, and train you in a safe, low-stress environment. We have mechanical low-tech and electronic high-tech adaptive equipment to fit your mobility needs including:

- Hand Controls/Steering Devices
- Pedal Extensions/Left Foot Accelerator
- Visual Aids/Secondary Control Aids
- Wheelchair Accessible Vehicles

DRIVER TRAINING

We will help you obtain or retain your driver's license by training you in a full range of roadway environments. Driver training will be fit your specific driving needs, whether you are a new driver, experienced driver, or someone in need of training with adaptive equipment.

DRIVER EVALUATIONS

A certified driver rehabilitation specialist will perform a comprehensive, objective assessment to determine the ability to drive safely, with or without adaptive equipment.

The Driver Evaluation includes:

- Knowledge of rules of the road
- Physical abilities
- Cognitive abilities
- Vision assessment
- Reaction time
- Open road driving
- Vehicle consultation

SENIOR DRIVER

Helping you or a loved one drive stress-free.

Driving in busy traffic, on expressways, at night, or in poor weather can be hard.

If you or a loved one have experienced:

- Decline in vision
- Reduced strength or mobility
- Memory loss

Our specialists will evaluate your driving ability and provide customized training.
